TO EXPERIENCE WORKING WITH NATURE

ACTIVITIES AVAILABLE

- Pond dipping
- Woodland management
- Understand reed bed water recycling system
- Wildlife identification
- Plant your own food
- Learn about ecosystems
- Learn about animal welfare
- Bread, pizza or butter making

ABOUT US

At Sheepdrove we believe that it is vitally important that everyone is reconnected to the environment and the source of their food. We find that the best way to do this is to engage children from a young age, inspiring them to find out where their food comes from.

FOOD PROVENANCE

Because of the unique farm environment at Sheepdrove, a visit can link aspects of your curriculum together. Not only will students learn about where their food comes from, but they'll see first hand where and how many different staple food ingredients are grown, reared and processed. We believe in seasonality and recognising the difference between organic and conventional farming practices.

Take a guided walk into Sheepdrove's organic arable fields, vegetable and flower gardens.

Learn how organic farming benefits wildlife and the livestock we keep here, and why organic farming is sustainable.

ANIMAL WELFARE

Why are animals so important to an organic farm? What resources do livestock provide? Why are our pigs woodland specialists? Why are native breeds important for grass and conservation? How does livestock benefit from organic farming?

ENVIRONMENT & HABITAT

Enjoy a guided walk through our ancient woodlands. What are the roles of different habitats and why are they so important? Learn how woodland is managed for timber and wildlife. Identify types of habitat and how nature provides pest control.
